MULTI-DISCIPLINARY ENGINEERING AND IT INNOVATION AT LA TROBE

Long before the government's innovation fund and ideas boom, La Trobe Engineering and IT students have been at the forefront of bringing technological ideas/concepts to reality. Get a sneak peek into the future by attending the 24th Annual Engineering and Information Technology Showcase at La Trobe University.

The showcase highlights the very best student projects from a variety of engineering and IT disciplines. Students work with industry and research centres to develop innovative solutions across sectors that include; defence, communications, power, food & agriculture, automotive, health, sports technology, civil/construction, transportation and others.

Learn about the showcase by watching the following videos:
